Subject: Letter of Recommendation for Arjit Chaubey

TO WHOMEVER IT MAY CONCERN

I am writing this letter on behalf of Mr. Arjit Chaubey. Currently, I am working as an Assistant Professor in the Indian Institute of Astrophysics (IIA), Bengaluru. Before taking a regular faculty position at IIA, Bengaluru, I was a Post-doctoral Fellow at the Max Planck Institute for Solar System Research, Germany. Presently, I am also a member of science team of Visible Emission Line Coronagraph (VELC) payload on Aditya-L1 space mission to be flown in the coming few months by Indian space agency. I certify here that Arjit will be working under me, learning about the Aditya L1 Solar project. He will be working on this internship project for 4-5 months and is required to spend over 8-10 hours per week for the same. Under my supervision, he will be learning about the specifics of the Aditya-L1 solar mission and importance of science questions that can be tackled using observations from this space mission. During this internship, he is supposed to work on reading literature, understand the research gap in the areas of CMEs research, and provide his insights to tackle some of the existing science questions. Based on my interaction with him, I found him sincere, motivation and passionate for doing excellent research in the coming years.

Sincerely,
Wageesh Mishra
